

AID MEASURES FOR WORKING PEOPLE

ARTICLES 72 - 73.

I. For all working people included in this Agreement, there is a series of measures to help with their sons and daughters' schooling:

- a) **Priority in booking a place** in the centre where the parents work as long as their characteristics allow it.
- b) **Discount of at least 50% of the prices** stipulated for the **curricular teaching** when parents are workers of the centre. In this case, they must have a dedication equal or greater than half the day. This would be maintained by the orphans of a working person transferred.
- c) **50% discount on the price of the dining and transport service** for the children of the company's staff with a dedication of at least half working day. This has a limitation: for the total number of users who use these two services, there is a maximum of 25% exclusively for children the company's staff. In case of too many people asking for it at the same time, preference will be for the workers with greater seniority.

Be careful! It is necessary to consult when we are in a situation of forced leave.

The children of workers who find themselves in this situation have the rights reflected in the previous sections, except those included in paragraphs 1a) of article 45 of the Convention.

II. For working people, it also includes a series of improvements that we just explain. They refer to accommodation, transport and maintenance:

1. Those working people who are in charge of monitoring the students with the dining room or recreation, will receive in exchange **the maintenance**. It's the same in the centres where there is a boarding school.

2. The rest of the staff not included in the previous section can use the school canteen paying the **50% of the price set for students**, not being able to total exceed 10% of the number of students who eat at the centre. It's the same in the centres where there is a boarding school.

3. The staff who provide support and surveillance services in the **transport school service** and the times that this generates, they will have **right to gratuity** of the same for the time dedicated to this task. This does not affect the length of his/her day.
